Introduction

This document is to help treasurers use FMS especially where infrequent transaction types are used, e.g. relating to case management such as managing surplus grant money and handling corrections when transactions have been reconciled. It also gives guidance on the Fund types and bank accounts to use for transactions.

The Aide Memoire should be used in conjunction with the FMS User Guide which is found in System Help from the top right of the FMS screen. In addition there is a Transaction Reference Table showing all the FMS Analysis codes with explanations.

This Aide Memoire can be accessed through SSAFANet either directly or via the link on the top right of the FMS screen. It is also posted on the Treasurer’s Page on SSAFANet.

Bank Accounts and Fund Types

FMS maintains records of the bank accounts used by the office. There will always be an Admin bank account to manage SSAFA Funds.

If the office manages cases there will also be a Client bank account. The balance in the Client bank account should be equal to the total balance on all the cases for the office.

Some offices have Restricted Funds where money is ‘ring fenced’ for a specific purpose.

Restricted Fund money should be managed using the Admin bank account.

FMS Aide Memoire

Please use this table for reference

Fund Type	Bank account to use	Comment
SSAFA Funds	Admin account	All money belonging to the office to be used with no restrictions applying
Non SSAFA Funds	Client account	All money held against cases, received as grants from Assistance Providers
Restricted Funds	Admin account	Money to be used for a specific purpose is held in a Restricted Fund that has been set up for that purpose

It is advisable to ask SSAFA support to set up bank accounts, normally done when an office starts to use FMS.

FMS Transactions

Every FMS transaction has the same format, some fields are mandatory and some optional depending on the nature of the transaction (e.g. all transactions using NON SSAFA Funds will require a case reference, all local expense items do not require a case reference).

As you enter a transaction FMS will indicate if the field is required.

Account Register Details [X]

FMS Aide Memoire

All fields in the example that have an exclamation mark are mandatory.

Field	Comment
Bank Account	Drop down list
Account Name	Will appear when the Bank Account has been selected
Receipt or Payment	Drop down list Receipt or Payment
Transaction Date	User entry, usually in the current financial year. An entry for a previous year can be made (see Year End section)
Fund	Drop down in alphabetical order, NON SSAFA FUNDS, RESTRICTED FUNDS, SSAFA FUNDS.
Section	Drop down list depending on Fund
Analysis	Drop down list depending on Fund and Section
Restricted Fund	Required if Fund type is RESTRICTED FUNDS
Narrative	Mandatory, use this for detail about the transaction
Account Number	Will appear when the Bank Account has been selected
Reference Number	Usually automatically generated unique RV or PV reference depending on Receipt or Payment. Some offices choose to enter their own Reference Numbers manually
Cheque / Payment Reference	User defined, can be generic e.g. BACS
Payee / Payer	Select from a drop down list or add your own Payee/Payer name as you enter the transaction
Case Reference	Drop down list. A case has to be set up before a transaction can be entered for it
Amount	Transaction amount, always a positive number
Sub Analysis	Optional field available on some transactions, used for local analysis

Analysis Codes

There is a set of Analysis Codes for every Fund/Section combination. These are sufficient for many offices. Please see the separate table of Analysis Codes for explanations.

If your office requires a new Analysis Code that isn't in the standard drop down list, you can enter it as an Analysis Code extension using the Analysis Code Ext tab.

FMS Aide Memoire

The screenshot shows a dialog box titled "Analysis Code Extension Details". It features a blue header bar with the title and a close button (X). Below the header, there are four input fields, each with a red exclamation mark icon to its right, indicating an error. The fields are: "Fund Type:" (a dropdown menu), "Fund Section:" (a dropdown menu), "Analysis Code:" (a text input), and "Analysis Description:" (a text input). At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

User Analysis Codes have to start from the letter 'o' so that there is enough room for system codes from a to n where they might be required.

Please ask SSAFA support for advice if you would like to set up your own Analysis Codes, they are additional to the standard set and may not be necessary.

Sub Analysis Codes

Sub Analysis Codes are optional, there are no pre-set Sub Analysis Codes. Certain transactions will allow Sub Analysis Codes to be entered as an option.

Note, Sub Analysis Codes cannot be made mandatory on any transactions, it is up to the Treasurer to realise that a Sub Analysis Code is required as they enter the transaction.

Sub Analysis Codes are only used in user generated reports from the Data Analytics tab.

You can add a Sub Analysis Code from the 'Sub Analysis Codes' tab.

The screenshot shows a dialog box titled "Sub Analysis Detail". It features a blue header bar with the title and a close button (X). Below the header, there are two input fields, each with a red exclamation mark icon to its right, indicating an error. The fields are: "Sub Analysis Code:" (a text input) and "Description:" (a text input). At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

The code can be any letter from 'a' to 'z'. Sub Analysis Codes apply to the whole system, they are not specific to any Fund, Section or Analysis Code combination.

FMS Aide Memoire

Please ask SSAFA support for advice if you would like to set up Sub Analysis Codes, they are not normally required.

Payee / Payer

The Payee / Payer field can be entered manually each time. However, if you use an organisation regularly (e.g. Royal Logistic Corps, Argos), it is advisable to set up a Payee / Payer entry that can be used when you enter transactions. You can update the list using the Payee/Payer tab.

Payee/Payer - Buckinghamshire

The screenshot shows a 'Payee/Payer Details' dialog box. On the left, there is a list of names: Aylesbury V&D Division, Central Office, Construction and Plant Training, HMP Springhill, Joanna Berkley (highlighted), Mr Hamza Ahmed Sohail, N Cutmore, and South Buckinghamshire. Below the list are 'Add...' and 'Update...' buttons. The main dialog area has a 'Name' field with a red exclamation mark icon, an 'Is Active' checkbox which is checked, and 'OK' and 'Cancel' buttons.

Case Reference

Every case has to be set up in the table of cases. Cases can be active or inactive and FMS will only allow you to make a case inactive if the case balance = £0.00.

You can update the Case Reference table by using the 'Case Ref' tab.

The screenshot shows a 'Case Reference Details' dialog box. It contains the following fields: 'Case Reference Code' (empty, with a red exclamation mark icon), 'Case Reference Name' (empty, with a red exclamation mark icon), 'Fund Code' (NONSSAFA), 'Opening Balance Bank' (0.00), 'Opening Balance Cash' (0.00), and 'Total Amount' (0.00). There is an 'Is Active' checkbox which is checked and a radio button for 'Case has an Opening balance'. 'OK' and 'Cancel' buttons are at the bottom. The dialog is overlaid on a background window showing a table with columns for 'Difference' and '0.00'.

FMS Aide Memoire

Field	Comment
Case Reference Code	Unique identifier for the case, see guideline
Case Reference Name	Name of the Client, advisable to use surname followed by initials e.g. Harrison K
Fund Code	Always pre-set to NONSSAFA
Case has an Opening balance	Leave blank, this only applies when starting off a new office in FMS
Opening Balance Bank	Pre-set to 0.00
Opening Balance Cash	Pre-set to 0.00
Total Amount	Calculated. In practice cases only have bank balances, not cash balances
Is Active	Pre-set to be ticked. You choose when to make a case inactive. Making a case inactive is how to close a case in FMS. Cases will only close when the NON SSAFA balance = £0.00

Case Reference Format

The case reference should be easy to find in CMS2 (Mosaic) and it is good practice to check that the case balances in Mosaic match those in FMS.

Please follow the format below for case references

****Case References using CMS2****

CMS2 does not assign a unique case reference as CMS did. Different cases need to be identified in FMS and here is the recommendation.

CMS2 assigns up to 7 digits as a unique number for a person (client) and this can be used along with identification of when the case was started.

For example, person (client) number 287456 had a new case opened in March 2021.

Then the FMS Case reference would be 287456 2103

Some offices use FMS for more than one division, e.g. Somerset.

In this situation you can use characters to identify the Division

e.g. NS 287456 2103 would be a case for North Somerset opened in March 2021.

Note that FMS can allow case references up to 15 characters with no special characters, only letters, numbers and spaces.

Special Notes

The following notes and examples are to help with specific circumstances when using FMS. There are examples in the Appendices.

Bank Reconciliation

On the Bank reconciliation Tab, FMS will show you the starting balance of the bank account. Enter the balance from the statement you are using and also the bank statement date.

FMS Aide Memoire

Special note about the Bank Statement Date

It is important to make sure that you use the correct bank statement date. FMS will default to a date and it is unlikely to be the same as the bank statement date. Once you confirm a bank reconciliation the statement date is fixed and can't be changed by the treasurer. This point is especially important at Year-end; the statement date must be in December before the end of the year and must not go into January of the next year, otherwise the Form 12 report will incorrectly show transactions as unreconciled.

Statement Date:

Bank Code:
Bank Name:
Issuer Name:
Corporate Card Number:

Opening Balance:
Ending Balance:
Items you have marked:

December, 2021							
	Mon	Tue	Wed	Thu	Fri	Sat	Sun
48	29	30	1	2	3	4	5
49	6	7	8	9	10	11	12
50	13	14	15	16	17	18	19
51	20	21	22	23	24	25	26
52	27	28	29	30	31	1	2
01	3	4	5	6	7	8	9

Ticking Transactions

As you tick the transactions, FMS calculates a running difference between the Opening and Closing Balances. When the difference = £0.00 the 'Done' button will become blue and you can confirm your reconciliation. FMS then gives you the option to print your Reconciliation Report. You can always print the current and previous Reconciliation Reports using the Formal Reporting tab.

Receipts and Payments					
Transaction Date	Cheque/Payment No	Transaction Referen	Payee/Payer	Receipt	Payment

Done

If you have made a mistake please contact SSAFA support. We can reverse a reconciliation or change a reconciliation date, especially helpful at Year End.

Transaction Listing

The transaction list defaults to transactions in date order for the last 30 days. You can change the Accounting Year and/or the Transaction From and To dates.

You can click on a column to change the list to be in the sequence of that column (e.g. Reference Number).

You can search for a field content using the space with a small key in the column. Search functions are shown below.

Financial Transactions - Vale of White Horse

Accounting Year: 2022 Transaction From: 19/12/2021 To: 19/01/2022 Last 30 days

Surplus Grants, returning money, small remainders

Surplus Grants, returning money to assistance providers, retaining small remainders in SSAFA Funds

Example Appendix A

Grants from SSAFA Funds

Grants from SSAFA Funds can be paid covering part of the payment to help the client, and all of the payment to help the client.

Example Appendix B

Grants from Restricted Funds

Grants from Restricted Funds can be paid covering part of the payment to help the client, and all of the payment to help the client. Check that the conditions of the Restricted Fund are satisfied before making the payment.

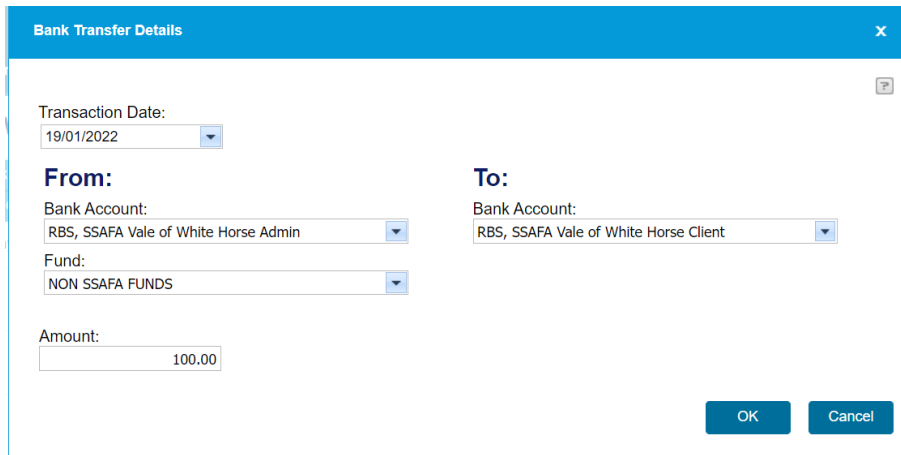

Example Appendix C

Bank Transfers

Bank Transfers are made using the Bank Accounts tab. This is an interim guideline because there will be a change to simplify bank transfers where you don't have to specify which fund type.

You can specify SSAFA Funds, NON SSAFA Funds or Restricted Funds. In practice this makes no difference because a bank transfer will generate an equal and an opposite transaction which means that the Form 12, 12A will not be affected. The two transactions generated by FMS can be reconciled against the bank statements.

Corrections

Reversing Reconciled Transactions

You can reverse a reconciled transaction but it can't be changed. Best practice is to reverse the transaction and enter the revised transaction using the same transaction date as the original transaction. The reversed transaction and the new one will reconcile against each other, there is no need for a bank transaction.

Example Appendix D

FMS Aide Memoire

Transferring money between Cases

Transferring money between Cases, e.g. when transactions have been posted to the wrong or an old case.

Pay out of the incorrect case and receive the money into the correct case using transactions that will cancel each other out in terms of the Funds and will match against each other on the bank reconciliation. No bank transactions will be required

Example Appendix E

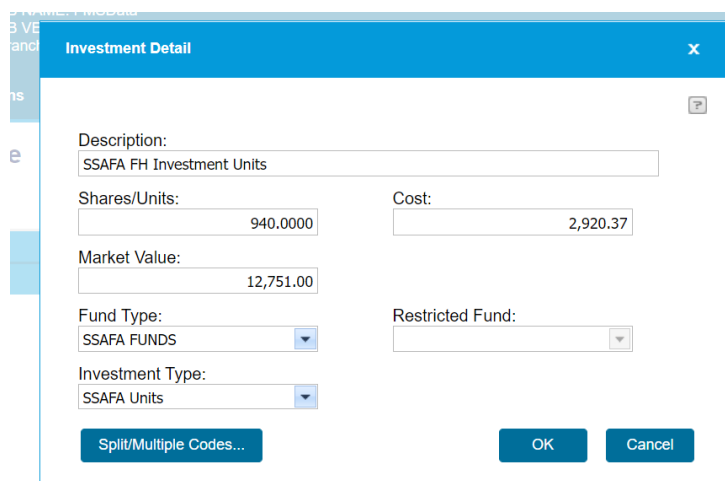

Grants intended for a different SSAFA office.

Grants received from assistance providers which are meant for a different SSAFA office. You can receive and send back the money to the assistance provider using a 'dummy' case. Use the same analysis code for the receipt and return of the grant so that the net figures are £0.00 in the bank account and in NON SSAFA Funds.

Example Appendix F

Investments Tab

Each year Central Office Finance will send you a statement of the investments you hold with SSAFA, Units or Instance Access accounts. Type the figures into FMS using the Investments tab each year. Figures are not carried forward into the next year, they have to be typed in every year.

The screenshot shows the 'Investment Detail' form in the FMS system. The form has a blue header with the title 'Investment Detail' and a close button 'x'. Below the header, there are several input fields and dropdown menus. The 'Description' field contains 'SSAFA FH Investment Units'. The 'Shares/Units' field contains '940.0000' and the 'Cost' field contains '2,920.37'. The 'Market Value' field contains '12,751.00'. The 'Fund Type' dropdown is set to 'SSAFA FUNDS' and the 'Restricted Fund' dropdown is empty. The 'Investment Type' dropdown is set to 'SSAFA Units'. At the bottom of the form, there are three buttons: 'Split/Multiple Codes...', 'OK', and 'Cancel'.

FMS Year End

Year End Sign Off Process

The Year End Sign off is a three stage process that has to happen in this sequence. Use 'Year End' at the top right of the main FMS screen to access this process.

Please make sure that the bank reconciliations are dated in late December and that you have completed the checks detailed in Appendix G before signing off for the year.

FMS Aide Memoire

Sign Off Sign Off Date: Name:

Central Office Sign Off

Sign Off Sign Off Date: Name:

Stage	Signed off by	Comment
1 Treasurer	Branch, Division, Committee Treasurer assigned to the office	Once signed the treasurer can't make any changes in FMS for that year. Central Office staff can still make changes if required.
2 Auditor/Examiner	Independent Reviewer	Reviewers may have access directly to FMS to see transactions and for reports, and to complete this stage. Alternatively, if your reviewer conducts a manual review without accessing FMS, then please ask Central Office finance to sign off on behalf of the Reviewer. Central Office staff can still make changes if required.
3 Central Office	Central Office Finance Team member	Once Central office have signed off then no more changes can be made in FMS for that year.

Bank Reconciliation - Special note about the Bank Statement Date

Remember the bank statement date on the final reconciliation of the year should be in the correct year. Normally treasurers will complete their year end in January and may forget to check that the final bank reconciliations for the previous year must be dated in December of the previous year. It is good practice to date the reconciliation in late December, e.g., 29 December. This will allow for a reconciliation if corrections have been needed.

Once you confirm a bank reconciliation the statement date is fixed and can't be changed by the treasurer. This point is especially important at Year-end; the statement date must be in December before the end of the year and must not go into January of the next year, otherwise the Form 12 report will incorrectly show transactions as unreconciled.

Printing Reports

Reports are generated using a pop-up new window each time called Grid View Print. The first time you use FMS you may find that the Grid View Print window hasn't appeared. The reason is likely to be that pop-ups aren't allowed from the FMS site. This situation is shown differently depending on your computer browser window, usually in the top right corner when you ask to produce a report. You need to "always allow pop-ups from this site" and then the pop-up Grid View Print window will come up next time and every time you run a report.

Appendix B Grants from SSAFA Funds

Example 1 – Using a combination of SSAFA Funds and NON SSAFA Funds

Paying AO Retail Ltd £350.00 for a cooker using £300.00 NON SSAFA Funds and £50.00 SSAFA Funds.

All paid to AO Retail Ltd from the Client bank account in one bank transaction for £350.00. This bank transaction can be reconciled with the 2 grant transactions in FMS (£50.00 from SSAFA Funds, £300.00 from NON SSAFA Funds).

1 Transfer £50.00 from the Admin account to the Client account. Use the Bank Accounts Tab.

This Bank Transfer generates 2 transactions in FMS to reconcile with the physical bank transfer of £50.00.

Example 3 – Returning Surplus Grant Money to SSAFA Funds

Sometimes money comes in from Assistance Providers and all or part of the grant from SSAFA Funds can be returned. There may also be a surplus at the end of the case and some of the SSAFA Funds grant can be returned.

Return £50.00 to SSAFA Funds. In this example the £50.00 is in the Client bank account because the grant from SSAFA Funds had been transferred from the Admin to the Client bank account before being paid to the supplier as in Example 1.

FMS Aide Memoire

1 Pay the money out of NON SSAFA Funds and the Client bank account.

Appendix C Grants Using Restricted Funds

Example 1 – Buying an item using a combination of NON SSAFA Funds and Restricted Funds

Paying Argos £350.00 for a cooker using £300.00 NON SSAFA Funds and £50.00 Restricted Funds.

All paid to Argos from the Client bank account in one bank transaction.

1 Transfer £50.00 from the Admin account to the Client account. Use the Bank Accounts Tab

Bank Transfer Details

Transaction Date: 13/01/2022

From:
Bank Account: Nat West, Salisbury Admin
Fund: RESTRICTED FUNDS

To:
Bank Account: Nat West, Salisbury Client

Amount: 50.00

OK Cancel

2 Pay £300.00 from NON SSAFA Funds to Argos

Appendix E Transferring Money between Cases

Occasionally a Grant can be received and entered into FMS using the incorrect case (e.g. if there are 2 open case for the same client or for 2 clients with the same surname).

Pay out of the incorrect case and receive the money into the correct case using transactions that will cancel each other out in terms of the Funds and will match against each other on the bank reconciliation. No bank transactions are required in this example.

1 Pay £250.00 out of the incorrect case

The screenshot shows the 'Account Register Details' form for an incorrect case. The form is titled 'Account Register Details' and has a close button (X) in the top right corner. The form is divided into two columns of fields. The left column contains: Bank Account (RBS, SSAFA Solihull Client), Account Name (SSAFA Solihull Client), Receipt or Payment (Payment), Transaction Date (25/01/2022), Fund (NON SSAFA FUNDS), Section (Code: 5) (GRANTS PAID TO HELP CLIENTS), Analysis (Code: a) (Grants paid to help clients), and Restricted Fund. The right column contains: Account Number (48626007), Reference Number (PV001579), Cheque / Payment Reference (Transfer), Payee / Payer (SSAFA Solihull), Case Reference (Westley B A Mrs, 1178169 2021), Amount (250.00), and Sub Analysis. The Narrative field at the bottom contains the text: 'Transferring £250.00 from Westley B A Mrs, 1178169 to Shean K, 1497580 2106'. At the bottom of the form are four buttons: 'Split/Multiple Codes ...', 'Void Transaction', 'OK', and 'Cancel'.

2 Receive £250.00 into the correct case

The screenshot shows the 'Account Register Details' form for the correct case. The form is titled 'Account Register Details' and has a close button (X) in the top right corner. The form is divided into two columns of fields. The left column contains: Bank Account (RBS, SSAFA Solihull Client), Account Name (SSAFA Solihull Client), Receipt or Payment (Receipt), Transaction Date (25/01/2022), Fund (NON SSAFA FUNDS), Section (Code: 5) (GRANTS PAID TO HELP CLIENTS), Analysis (Code: a) (Grants paid to help clients), and Restricted Fund. The right column contains: Account Number (48626007), Reference Number (RV001141), Cheque / Payment Reference (Transfer), Payee / Payer (SSAFA Solihull), Case Reference (Shean K, 1497580 2106), Amount (250.00), and Sub Analysis. The Narrative field at the bottom contains the text: 'Transferring £250.00 from Westley B A Mrs, 1178169 to Shean K, 1497580 2106'. At the bottom of the form are four buttons: 'Split/Multiple Codes ...', 'Void Transaction', 'OK', and 'Cancel'.

Appendix F Grants Intended for a different SSAFA Office

Occasionally an Assistance Provider sends a Grant to the wrong SSAFA office (e.g. similar names East Devon, North Devon)

Set up a 'Dummy' case to receive and send back the money. Use transactions that will cancel each other out in terms of the Funds and will match against each other on the bank reconciliation. No bank transactions are required in this example.

1 Set up a Dummy case
